

Environmental policy

The Repairs and Maintenance and Asset Management and Development sections of Nottingham City Homes provide a comprehensive, high quality repairs and maintenance and new build service for our tenants and leaseholders and commercial customers.

We recognise the need to protect and enhance the local and global environment through our own and others activities. We are committed to minimising our adverse environmental impacts, while enhancing the quality of life for our customers.

We will make sure, through leadership and delivery of the highest standard:

- compliance with all applicable legal, regulatory and other requirements
- prevention of pollution to air, land and water
- continual improvement by setting specific, measurable, achievable and realistic, objectives and targets at all levels of planning and service delivery
- staff and people working on behalf of the company, are aware of and understand this policy.

This policy has been communicated to all employees and subcontractors and is available to all members of the public on request. The Policy is published on our website and on our intranet.

This policy was approved by

Chris Culleton
Director of Repairs and Maintenance
